I-Suite Version 6.01.00 Release Notes

Date: April 17, 2006

Release: I-Suite 6.01.00

Description: The primary focus of this release is to combine all I-Suite applications including the two new modules, Demob and Supply into a single application environment. Additional updates to I-Suite 2006 include: database stabilization, consistency of functionality, expansion of the ROSS import to include crewmembers, enhanced security features and financial data export capabilities. Please see attached table for specific changes included in this release.

Important things to know prior to installing version 6.01.00

- System administrative privileges are required to properly install I-Suite. You must reboot after the installation is finished and re-login with system administrative privileges for the install to complete.
- The installation of I-Suite Version 6.01.00 will remove I-Suite 2005 versions.
- Previous versions of I-Suite are not compatible with this version. There is no conversion process for 2005 to 2006.
- System administrative privileges are not required to run the application.
    - To set up the I-Suite server, the user initial server login name is "admin" and the default password is "forests".
    - This login will launch a new setup password screen
    - The initial password to copy the ISuiteBlank and to attach the practice database is "forests".

Please visit the I-Suite webpage for additional information on the installation process and user documentation http://isuite.nwcg.gov.

Refer to the following tables for specific information.

Module/ Process Affected	Change Category	Description
General	New	• Consistency of functionality in all modules • All modules utilize the grid format to manage resources. • Filter and sort resources in the grid. • View subordinate resources in the grid. • Select what fields to display in the grid. • Ability to set the order that fields display in the grid. • Can set grid colors.
Security	New	• All databases including backups are encrypted and require a password. • A user name and password must be established to open the application. • Access to specific modules can be customized for each user account. • Social Security Numbers do not print on any documents. • Financial export and repository documents are encrypted.
DB Admin / ROSS Import	New	• Crewmembers and operators are included in the ROSS import process.
Custom Reports	New	• Expanded custom reports for all modules. • Ability to export and import custom report designs between ISuite databases. • Can export the data from a custom report in different formats. • Can export the actual report to different formats including PDF.
Cost	New	• Ability to view and manage costs at the member/subordinate resource level.
Data Admin	New	• All incident data will be managed in the Data Admin module. This data includes: Incidents, Accounting Codes, and lookup tables.
Demob	New	• The new Demob module includes several new fields and reports to facilitate the demob process.

Supply	New	• The new Supply module allows the user to track supply items. Including:
		  o Establish and manage inventory
		  o Issue and return items
		  o Print waybills for accountable property tracking
		  o Print waybills to release property

Module/ Process Affected	Change Category	Description
Database Admin	New	• Ability to export and transmit casual pay and daily Cost accruals electronically has been implemented.
Help	New	• The new help system allows the user to access help from within the application. Including: ○ View by contents ○ Search for keywords ○ Print a selected topic and/or it's subtopics ○ Encompasses all I-Suite User Guides
